Practice Exercises

Lab exercises are intended to be a stress-free way to learn and experiment. Students may work together, but each student must submit his or her own work.

Lab Exercises are to be completed in-class. They will not be graded for correctness, only completeness. Students must make a reasonable effort in order to receive full credit. Feedback and assistance on exercises will be provided by the lab instructor in lab and during office hours.

Quizzes

Quizzes are in-lab, graded coding assignments done on the computer (i.e. not hand-written code). The problems are based on previous practice exercises. Students work individually on quizzes.

Projects

Three to four larger out-of-class projects will be assigned in lecture. Project grades will be part of the lab grade. Projects must be completed individually.

Grading Rubric

Projects and quizzes will be graded on the following scale:

Program Correctness	70
Documentation and Style	15
Method Signatures and File Formatting	15

Lab Grade

The lab grade is 25% of the overall grade for the course. The breakdown for lab grade is:

Practice Exercises	30%
Quizzes	30%
Projects	40%

Attendance

Attendance in lab is required. Attendance will be tracked via a Sign-Out sheet. After 3 unexcused absences, there will be a flat 10% deduction applied to the final lab grade. Absences due to WVU related activities will be excused.

Example: 93% lab grade, on fourth unexcused absence: Final Lab Grade = 93% - 10% = 83%

Computer Use

Lab computers and the Eclipse IDE must be used to complete the lab exercises and quizzes. Students may utilize laptops to display reference material such as assignment instructions only when working on lab exercises. Laptops cannot be used when working on quizzes.
